

World Class Manufacturing Drive Waste out of your Value Stream

Short Course: 25th & 26th October 2010

Program Facilitator:

Jay Dixit, Management Consultant and Director at JFKM Pty Ltd (Business Enhancement Services).

Jay is an experienced Operations Executive with a long and distinguished career working overseas and in Australia within various industries such as Machine Manufacturing, Software, Metals, Packaging and Food.

With an engineering background, Jay developed his skills in strategic planning, leading change, lean manufacturing, six sigma, business development, new systems and process development and led initiatives in challenging environments relative to start-up and turnaround situations. Jay excels at influencing and motivating organizations, developing autonomous teams through coaching and mentoring, providing leadership and creating an atmosphere and conditions for people to achieve and exceed objectives.

Jay has led turnaround and business transformations engaging people at all levels from Shop floor to CEOs and boards of directors whilst implementing Lean Transformation, Operations and Supply Chain initiatives based on Six Sigma principles for various organisations including Signum Specialties. Jay is presently working with Gerard Lighting.

Jay has degree in Mechanical Engineering and has MBA in operations management. He is member of Australian Institute of Company Directors (AICD), Australian Organisation for Quality (AOQ), APICS, Australian Institute of Management (AIM) and Australian Indian Business Chamber (AIBC).

Course Overview:

Course participants can expect to gain a good understanding of the principles behind WCM which go beyond Lean Manufacturing and most important of all how to engage employees. This will allow participants to critically look at their organisations/processes, decide what they need to do and will help them formulate strategies to reduce/eliminate waste, meet customer requirements, save working capital & have a committed and engaged workforce that continuously refines and improves all processes within their organisations to improve profitability.

The sessions will include games simulation, videos and working in groups.

Primary Concepts, Tools and Techniques.

- Introduction to World Class Manufacturing (WCM)
- 7 types of Wastes
- 5S / Visual Workplace
- Introduction to Value Stream Mapping
- Set Up Reduction
- Pull Systems
- Theory of Constraints
- Total Productive Maintenance/Autonomous Maintenance
- Human Perspective (How to get your employees motivated and engaged)

The overall outcome of the session is to give participants a good understanding of principles behind WCM which go beyond Lean Manufacturing & most important of all how to engage employees. This will allow participants to critically look at their organisations/processes, decide what they need to do and will help them formulate strategies to reduce/eliminate waste, meet customer requirements, save working capital and have a committed and engaged workforce that continuously refines and improves all processes within their organisations to improve profitability.

Who Should Attend?

Executives and Managers involved in the overall management of and/or of key elements of the supply chain in the manufacturing field. This includes Procurement Managers/Directors, Logistics Managers/Directors, Operations Managers/Directors, Management Consultants and Managing Directors,
