# CENTURION COMMITTED TO BEING THE BEST

## LOGISTICS LEADERSHIP

Centurion shapes the future of 'end to end' logistics solutions in Western Australia, matching its track record of performance to industry-leading technology to provide customers with flexible, cost-efficient warehousing, storage and on-time delivery.

We willingly work with customers to facilitate the most effective supply chain service for their individual requirement.

Partnership, with the mutual benefit it brings, has been the principle underpinning Centurion's operations since our company was founded in 1971. Today we use the most sophisticated inventory tracking systems to provide complete, safe and secure logistics services.

## SAFETY

Safety is at the cornerstone of our business. Protecting the safety of our people, our clients, our partners and the communities in which we operate is at the heart of our operations. Backed by simple and clear policies and procedures, safety is ingrained in our culture where we encourage our people to take personal responsibility for thinking and acting safe.

Safety is our top priority, and Centurion's performance reflects the importance we attach to the care and wellbeing of our staff and customers. Worksafe WA statistics show Centurion has significantly less lost time injuries than the industry average.\*

## QUALITY OF SERVICES

Centurion is accredited to ISO 9001 for quality management standards and HACCP accredited for food safety. We also hold a number of other accreditations across our full range of operations.

We promote environmentally sound practices within Centurion's transport and warehousing operations, particularly in energy usage. Our company goal is to achieve carbon emission reductions greater than the mandated targets.

To ensure that technology generates genuine cost-effectiveness and flexibility Centurion's in-house IT department works with customers to maximise efficiencies in transporting, warehousing and distributing their goods.

## ALL GOODS CAPABILITY

Centurion operates the most complete metropolitan and regional branch system in Western Australia – no other service provider has our network or capability to transport, warehouse and distribute all forms of goods throughout the state.

## TECHNOLOGY

Our 'track and trace' technology represents peak inventory control, with substantial benefits for customers. We provide secure, real time, detailed and transparent management of goods – from individual items as small and vulnerable as an ice cream cake, electrical and whitegoods, to the massive Haulpaks used in the resources industry.

## TRANSPORT

Centurion operates more than 650 vehicles and other items of specific-purpose equipment in its handling and transport of goods. We travel more than 25 million kilometres each year, with some regular lineage routes in excess of 3000 kilometres.

Centurion's metro courier service and express parcel network provides a reliable, cost-effective solution for all parcel pickups and urgent deliveries throughout the greater Perth metropolitan area.

## WAREHOUSING

With facilities in Western Australia, Victoria and Queensland, Centurion warehousing provides customers with the best storage and offsite management available, with our monitoring systems ensuring layers of certainty in inventory control. State of the art facilities,

purpose-built in 2009 for all goods – freezer, chiller or ambient storage – secured 24/7, long or short term.

## DISTRIBUTION

Over four decades, Centurion has built an unsurpassed statewide distribution network with branches and expertise in key regional centres. This enables highly responsive logistic solutions that other providers cannot match.

# OUR CORE CAPABILITIES

**Our people** are the engine for growth. Retaining, developing and rewarding them is one of our top three strategic priorities.

**Our commitment** to safety is not negotiable. Our aim is to have zero incidents or injuries and zero negative impact on the environment by encouraging our team to Think Safe and Act Safe.

**Our pedigree** is in growing distribution, supply chain and service operations through many business cycles.

**Our leadership** team is stable, highly qualified, experienced, energetic and passionate about the businesses they lead. They are focused on achieving our targets for growth and meeting the needs of our clients.

**Our long-standing relationships** with high-growth, high-value customers and our global brand partners keeps us at the forefront of innovation.
