

FRIEND OF THE LAA

DEMATIC

At Dematic we have a passion for innovation and quality and a total commitment to creating logistics results for our customers.

Dematic is one of the world's leading suppliers of logistics automation and IT. We work with our customers to develop logistics solutions using consulting methods, system simulation, comprehensive system design, local engineering, manufacturing, project management and 24/7 service and support.

We have a worldwide knowledge network consisting of more than 3500 associates in more than 75 locations. Dematic employs close to 400 people in Asia-Pacific, with around 300 based at the regional head office in Sydney, and have a strong and growing presence throughout the region

Dematic's solution portfolio is designed to meet the demands of an ever changing logistics and supply chain landscape.

- Retailers
- Wholesalers
- Food and beverage manufacturers
- Transport and 3PL's,

as well as a wide range of other distribution and manufacturing industries have benefited from Dematic's global expertise and extensive local knowledge.

In addition to integrated logistics systems and smart storage solutions, our Wireless Logistics group delivers proven IT systems designed to optimise distribution efficiency, accuracy and productivity.

Dematic is also a market leader in the provision of basic warehousing and storage systems through its national network of independently owned and operated distributors, Colby Storage Solutions.

At Dematic, we like to think of ourselves as *Your Window to World's Best Practice*. With 40 years experience in developing intelligent materials handling systems, we offer customers:

- A unique combination of local knowledge and global expertise
- Access to the world's most comprehensive bank of project management, design, application and systems engineering resources
- Innovative solutions that provide efficient, reliable and cost-effective performance
- On-going service and support to ensure exceptional life cycle value; and
- Greater security and reliability through single source responsibility.

Local and international experts work closely with customers to identify problems and opportunities, and advise them on the most effective solutions to lower costs and improve:

- Productivity
- Throughput
- Order turnaround
- Inventory management
- Safety
- System accountability; and
- Customer service levels.
