

FRIEND OF THE LAA

PULSE Logistics Systems is a recognised leader in the development and delivery of Warehouse Management Systems (WMS), Supply Chain Execution, Web Services and Automatic Data Capture Solutions. PULSE systems integrate seamlessly with ERP, transport management and other legacy business systems. With exceptional industry experience and proven solutions in local and international corporations, PULSE has been optimising logistics performance and driving costs out of its customer's operations and supply chains for many years.

PULSE invests heavily in R&D and is recognised as a pioneer of the latest global technologies. PULSE is at the forefront of emerging technologies such as Voice Picking and RFID working closely with our clients to make these a valuable reality.

PULSE employs architecture engineered to scale in line with business growth and structural change. As business volume increases, or branches are added and reorganisation takes place the PULSE WMS continues to effectively manage your most vital business arteries.

In the day-to-day operation of warehouses and distribution centres PULSE WMS not only manages the most complex elements of stock movements and provides total visibility of inventory, but also provides on-the-spot monitoring of labour force activity and workloads.

PULSE has an extensive product suite and services that include:

The PULSE Team of highly regarded industry specialists is dedicated to streamline your logistics pipeline, either via sound advice and consultancy or with the installation of the 'best of breed' PULSE WMS solution. The meticulous project management methodology ensures the system implementation is achieved on time and on budget. PULSE value added services range from facility design, site relocation, labeling, system integration, MHE selection and on-site training.

As the Winner of the highly respected Citibank "Best Use of Technology Award" PULSE is extremely proud of its success and its prestigious blue chip customer portfolio. PULSE has successful installations as far away as East Africa and in the Pacific Basin in Singapore, Malaysia, Thailand, the Philippines and Indonesia. In Australia, where its main customer base enjoys local, available development and support, PULSE has a number of substantial clients and reference customers which are the envy of the industry.

With offices in Sydney, Melbourne and Adelaide PULSE looks forward to adding your company name to this highly prized list of longstanding PULSE partners.
