DB Schenker Logistics now offers tracking by BlackBerry

Customer-specific search criteria and many different language versions

(Berlin/Essen, June 27, 2011) DB Schenker Logistics is making mobile shipment tracking even more convenient. Clients can now use BlackBerry smartphones to check the status of their shipments. The DB Schenker Tracking App is available as a free download on the BlackBerry App World.

The app offers the same convenience that has made recently-launched Version 2.0 for iPhones so attractive: clients can use more search criteria to track shipments, including all references entered at booking, such as the delivery note number and invoice number, as well as the air waybill and bill of lading.

The app is available in German, English, Chinese, Finnish, Dutch, Polish, Spanish and Czech.
